Art Unit: 3662

1. The Drawings are hereby objected to in that Figure 1 must labelled "PRIOR ART" in that it illustrates a prior art system and is so described in the Brief Description of the Drawings section of the Specification. Correction is hereby **required**.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 5-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In each of independent claims 5, 7, and 8, the uses of the terms "broad," "narrow," "short-range," and "long-range" are indefinite and unclear: (1) in that each is a relative term with no point of reference to define them in context, and (2) in that for each it is unclear in context what is meant in using them to modify the term "antenna characteristic."

Further with respect to point (1), what is the dividing point between "narrow" and "broad" in context? Likewise, what is the dividing point between "short-range" and "long-range" in context?

On lines 8-10 of independent claim 5, the use of the word "transmits" is unclear in the context of the action of the "switch." The similar uses of the word "transmits" with respect to a "switch" are likewise unclear in context in each of independent claims 7 and 8.

Art Unit: 3662

On lines 20-21 of independent claim 8, the phrase “according to the mono-pulse method” is unclear in context.

In each of dependent claims 9 and 10, it is unclear in context what is meant by stating that antennae “overlap.” Is it meant that the antenna patterns overlap?

Dependent claim 6 is unclear at least in that it depends from unclear independent claim 5. Dependent claim 9 is unclear at least in that it depends from unclear independent claim 7. Dependent claim 10 is unclear at least in that it depends from unclear independent claim 8.

4. Claims 5, 7, and 8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

5. Claims 6, 9, and 10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The examiner-cited prior art is of general interest for showing the state of the related prior art. It is noted that none of the references of

Art Unit: 3662

record switches antennas as claimed in independent claims 5, 7, and 8 at the pulse repetition frequency of the radar transmitter.
